HEATCRAFT TAKE CONTROL WITH INTERLINK

Heatcraft is proud to announce the introduction of a new range of InterLINK™ electronic controllers. The new electronic controllers are an extension to the popular InterLINK range, that are known to be a value for money and reliable refrigeration parts offer.

The range includes two new models to cover a wide range of static and ventilated cold storage units. Both models feature easy programmable features, the option to reset back to factory setting and industry standard mounting. The controllers are USB Unicard program enabled for quick and easy system customisation. The stylish European design and manufacture includes large digits and coloured icons, for at-a-glance operating status monitoring.

“The new controllers are priced to be a competitive alternative to other brands”, says Heatcraft Regional Manager, Trent Carter. “Like all InterLINK products quick, flexible and simple operation has been a key requirement”.

The new InterLINK controllers are in store now. Contact your local Heatcraft branch on **0800 653 330** or visit **heatcraft.co.nz** for more information.

Heatcraft Worldwide Refrigeration® is a global leader in commercial refrigeration serving over 70 countries worldwide building its vision of being first choice in refrigeration.
