THE KIRBY FRIDGEBOX TAKES A HUGE STEP FORWARD

Heatcraft have released the new generation Kirby® Fridgebox™ Series IV Outdoor Condensing Unit. This innovative new product has been designed with a compact footprint and includes Hypercore™ microchannel coil technology in place of the traditional fin and tube.

“The microchannel all aluminium coil delivers high performance and is extremely durable and lightweight”, commented Trent Carter, Heatcraft Regional Manager. “It will lower the amount of refrigerant in the system by up to 50%, compared to a conventional aluminium fin and copper tube design”.

The unit is easy service with the inclusion of removable access panels and accessible service connection points. The Fridgebox also arrives on site pre-wired with MP 15 phase failure protection to assist with installation.

The Kirby Fridgebox Series IV microchannel outdoor condensing unit is suitable for food & beverage businesses, convenience stores and liquor stores and will cover most medium temperature applications that use R134a, R404A and R507 refrigerants. It is suitable for high ambient conditions of 43°C and higher and can be installed either indoors or outdoors.

For more information, contact Heatcraft on **0800 653 330** or visit heatcraft.co.nz.

Heatcraft Worldwide Refrigeration® is a global leader in commercial refrigeration serving over 70 countries worldwide building its vision of being first choice in refrigeration. Setting the global benchmark in customer service, Heatcraft is at the forefront of sustainable technologies providing innovative refrigeration solutions that enhance the way we live.

Part of Heatcraft Worldwide Refrigeration, **Heatcraft** is a leading wholesale distribution business catering for the refrigeration and air conditioning trades with a distribution network of over 70 branch outlets across Australia and New Zealand.

The Heatcraft vision is to be the market leader in temperature and climate control solutions.
